

# Cloudflare Enterprise Plan

Cloudflare is a global cloud platform that delivers a broad range of network services to businesses of all sizes — making them more secure, enhancing the performance of their business-critical applications, streamlining remote worker access, and reducing reliance on costly, complex network hardware appliances.

Cloudflare powers more than 25 million Internet properties — including approximately 16% of the Fortune 100 — using a global network that covers 200+ cities in more than 100 countries.

## Cloudflare Enterprise Plan Overview

Cloudflare's Enterprise Plans provide our most advanced tools, support, and reporting. You can choose from two success offerings - Standard and Premium.

The **Standard Success Plan** included with every Cloudflare Enterprise plan helps you get started quickly with guided customer success-led onboarding, customer success guidance, and 24/7/365 email and emergency phone support, and advanced analytics

The **Premium Success Plan** includes everything in the Standard Success Plan plus a designated success team assigned to your account to provide highly customized tuning and strategic assistance at every step of the way.

## Why should organizations choose Cloudflare Enterprise Plan?

### Lower total cost of ownership at every growth stage

The Cloudflare Success Offering provides a customer success experience with simple, predictable pricing that lowers total cost of ownership.

### Choice of Success offering

Cloudflare's various Success plans offer different ways to meet your organization's needs. We are dedicated to being your advocates, product experts, and strategic advisors in helping you achieve your business and technical objectives.

### Exclusive access to products and features

Get exclusive access to Enterprise-grade functionality for advanced security, performance, and reliability for mission critical applications, networks, and teams.

### Guaranteed reliability and uptime

We offer a 100% uptime guarantee. Receive a 10x credit against the monthly fee, in proportion to the respective disruption and affected customer ratio. \*10x credit for Standard offering; 25x for Premium offering.
